

WE MOVE YOU

Valedo®Motion

MOTIVATING THERAPY AT THE CLINIC

OBJECTIVE ASSESSMENTS

Precise and repeatable assessments enable a standardized, objective analysis of movement performance parameters such as range of motion, reposition ability, smoothness of movement, isolation capacity and lumbar stability.

Documenting your patients' therapy progress facilitates optimal therapy planning.

LEARN FROM YOUR PEERS!

MOTIVATING AND FUN

An extensive library of clinically validated movement exercises has been designed by therapists, movement scientists and medical doctors to train therapeutically important movements. The exercises can be tailored according to the patients' abilities and therapy goals. The exercises are fun and will increase your patients' motivation for therapy.

REAL-TIME FEEDBACK

The high precision motion sensors capture even the smallest movements to allow for a real-time feedback visualization on screen. The visualizations will help your patients understand the movement tasks better and immediately adapt their performance to improve their movements and movement patterns.

TO CONTINUE THERAPY AT HOME, WE RECOMMEND: VALEDO®

Fight Back Pain by Playing Games. A medical device for digital back therapy at home.

WHAT EXPERTS SAY

Kevin Eisele

PT and owner of Reha-Zentrum Schwäbisch Gmünd, Germany

“ As the accurate sensors of the Valedo Therapy Concept capture even the smallest movements, the feedback for our patients is excellent. As a result, the ValedoMotion is a huge communication aid when practicing, carrying out and measuring the effectiveness of more precise movements. The documentation and reporting functionality visualizes the progress of the therapy. This enables us to explain the goals and therapeutic measures to patients in a clear and concise manner. By understanding these aims, the patients are more motivated and adhere to the therapy and exercises more closely. ”

WHAT PATIENTS SAY

Marian Keller

Patient with MS

“ I tried so many different types of therapy and it was always very stressful for me. With the ValedoMotion, I not only changed the way I move, but also the way I see and feel my body. It's fantastic! ”

Augmented Performance Feedback

3 Motion Sensors
(2 on the lower back + 1 on the chest)

TECHNICAL SPECIFICATIONS

Sensors

- Dimensions (L x W x H):
42 mm x 32 mm x 16 mm (1.65 in x 1.26 in x 0.6 in)
- Weight:
18 grams (each)
- Expected service life:
Min. 300 recharge cycles

PRODUCT DISCLAIMER

All Hocoma products are medical devices and must be used in strict adherence to the User Manual; failure to do so may result in serious personal injury.
